Abstract

Online Shopping is a lifestyle, e-commerce web applications, which provides various electronic and lifestyle products. This project allows viewing various products available enables registered users to purchase desired products instantly using now Cash on Delivery payment system can place an order by using option. This project provides easy access to Administrators and Managers to view orders placed using Pay Later options.

Introduction

 The WEB BASED ONLINE SHOPPING SYSTEM project mainly focuses on basic operations adding new product, new member and updating new information , searching product and members and facility to online shopping. This system has
Today our life is divided into two parts
-Physical Life: We met everyone physically
-Virtual Life: We met people on a virtual world called ‘Internet’.

Some Important Goals

- Catch more customer.
- Increase the traffic.
- Make more sale.
- Best customer service.
- Minimum Shipping time.
- Increase the number of reviews.
- Get Positive feedback.
- Customer follow up.

Objective:

The key objective to support the aims are :

- The objective of the Shopping systems is to increase the point of customer choice
- Reduce time used in shopping
- Efficiency in buying product

Languages & Tools

Necessary

Languages:

- HTML 5
- CSS 3
- JavaScript
- jQuery
- Ajax
- Bootstrap
- PHP Framework(Laravel)
- MySQL

Tools:

- Adobe Photoshop
- PhpStorm
- Xampp

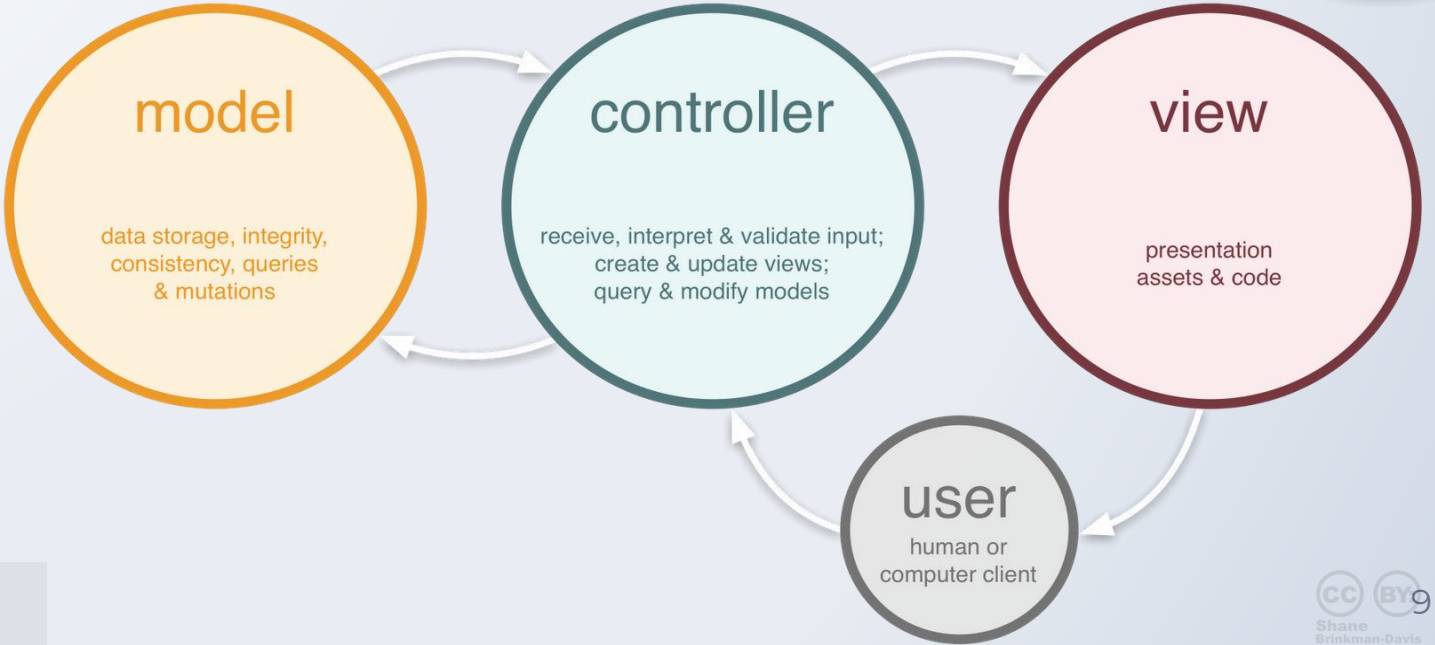

METHODOLOGY

Use PHP framework Laravel

Conclusion

The WEB BASED ONLINE SHOPPING SYSTEM is developed with the help of different tools such as PHP, HTML, CSS, Bootstrap, JavaScript, MYSQL, SQL.
The developed system has met the objectives of result processing of any exam with reliability. Moreover, this system has high operational speed and it is user-friendly. This system is valuable and usable in the perspective of any country.

- Widespread effects on the economy and ecommerce
- With new technology comes better ways of doing things
- Protecting yourself can make shopping online easy and beneficial to all involved

Limitations

- In this application search is limited to string or by number. Cannot do search by photo and finger print.

- A typical virus can wash out all information stored in the computer. Then retrieval restoration of data becomes necessary.
- Does not include payment system such as bkash,doutch bangla or mastercard.

- Admin manage all order and view order

- Many necessary features are not available now for both user and admin.

Future Plan

- The project made here is just to ensure that this product could be valid in today real challenging world. Here all the facilities are made and tested.
- Currently it is not visible on virtual world (Internet) because of some limitations of project. In future it may be there.
- Payment System include
- Users can signup / login using their social media account such asface.
- Add more feature in admin panel.
- Users can sell their products.

Thank
you
